

Patient Portal

UNMH Health System is pleased to announce a new feature available through your electronic portal "My Health UNM" You can contact your health care provider directly through My Health UNM Patient Portal.

If you are interested in messaging or would like to sign up for the Patient Portal, please notify your health care provider during your next visit.

How can I access the portal for the first time?

You will receive an email notification in the account that you provided at the time of your visit and it will instruct you on how to create your MyHealthUNM account. *Click on the link provided in the email notification.*

How do I set my Password and create an Account?

When you first log in, you will need to verify your email, your date of birth, and create an account using the Access code you provided. You will then create and enter or set a private password that is known only to you. ***Please make note if your password, as we will not be able to provide it to you if is lost or forgotten.***

Contact information will be available on log on screen of the portal for password related questions.
